

Note from the Phippsburg Conservation Commission

Phippsburg is full of wings this month -- BUTTERFLIES are attracted to gardens and to the wild asters and goldenrod along the roads. Here are three of the largest: Red Admiral, (on cimicifuga flower); Monarch (on Joe Pye weed); and Great Spangled Fritillary (on marigolds).

Think of planting flowers next year to attract them -- here are a few that they like:
zinnias, marigolds, butterfly bush, asters, bee balm, indigo, joe pye weed, lupine, mallow, phlox, and purple coneflower.
